Cogage Arrow

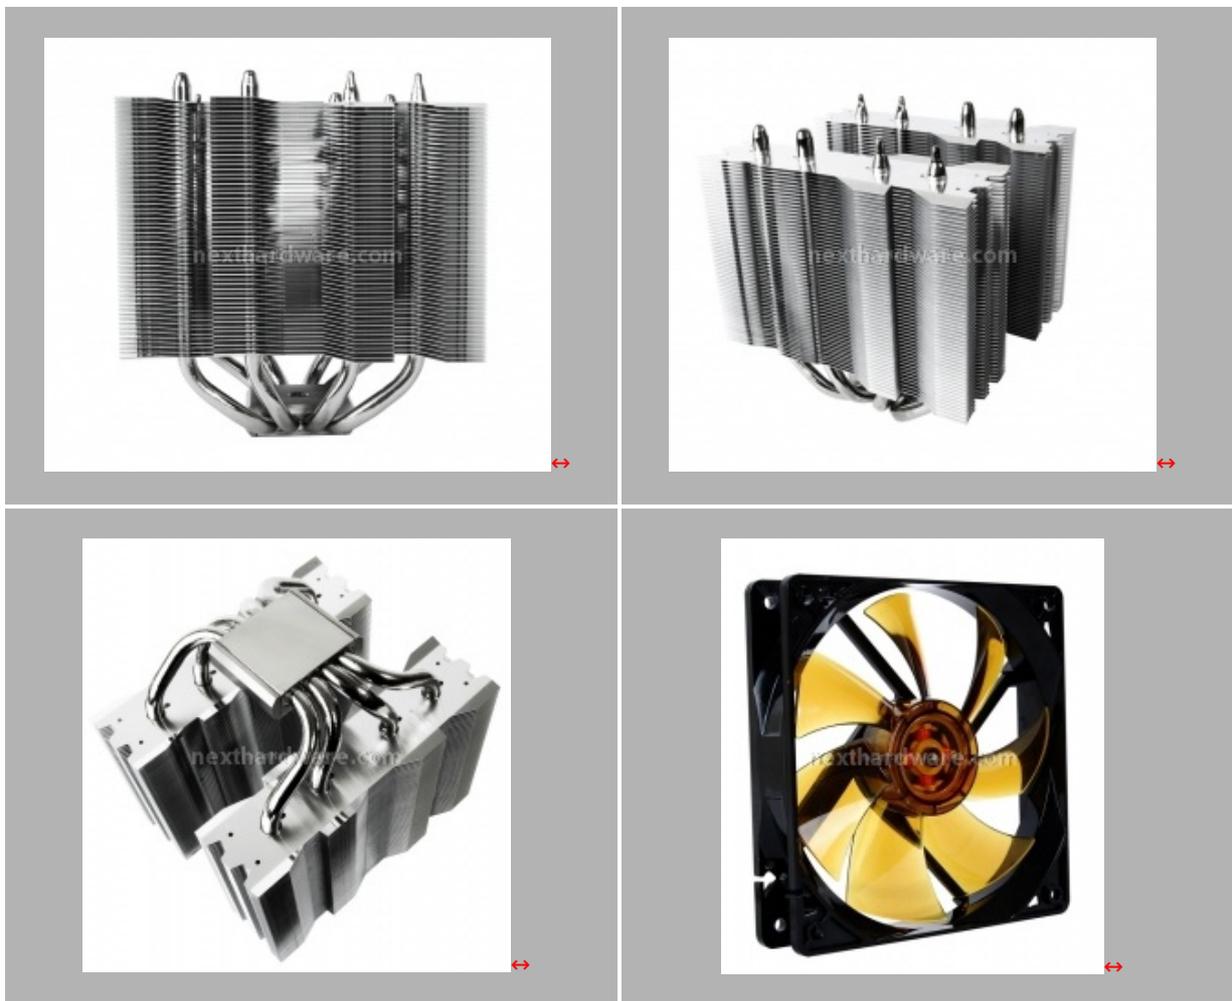

LINK (<https://www.nexthardware.com/news/raffreddamento-aria/1729/cogage-arrow.htm>)

Nuovo dissipatore per CPU da Cogage

Dopo TRUE Spirit ed MST140, arriva anche il fratello minore di IFX-14: Arrow.

Perde due Heat Pipes, ma questa volta, almeno dalle immagini, ci sembra che le rifiniture siano state mantenute ad alto livello: il trattamento superficiale è ora esteso anche ai tubi di calore.

Scheda tecnica

● Special Features:

- 4 X 8mm large sintered heat-pipes efficiently remove excessive heat away from the CPU, allowing for great Overclocking potential
- Nickel Plated Base and Heatpipes, increase the longevity of the heatsink by slowing oxidation and deterioration rates... maintained performance over time
- Double fin stack design, provides each tower with an impressive 147 x 103mm of surface area for heat dissipation
- Special Arrow fin design, which allows cool air to pass through while rapidly moving heat away and maintaining a quiet operating volume
- Soldered Heat-pipes and Copper Base, ensure all components maintain the highest of Thermal Efficiency
- Support for Multiple-Platforms: Intel Socket 1366/1156/775 (AM2/AM3 Optional)
- Includes a Quiet 120 x 25mm PWN controlled fan
- Capable of supporting up to three fans for the Ultimate Enthusiast (38mm Fan will fit between the two towers)

● Specifications:

- Cooler Dimensions: Length 147mm x Width 123mm x Height 160mm
- Cooler weight: 825 g (excluding Retention Hardware and Fan)
- Heat-pipe: 8mm Sintered Heat-pipe x 4 units
- Cooler Base Material: C1100 Pure Copper with Nickel Plating.
- Fan Compatibly: 120 x 25mm / 140 x 25mm / 120 x 38mm

Compatibility :

- Intel Socket 1366/1156/775 (AM2/AM3 Optional)
