Adobe Lightroom 4.2 ed ACR 7.2 RC

LINK (<https://www.nexthardware.com/videographia/news/visualizzazione-sviluppo/317/adobe-lightroom-42-ed-acr-72-rc.htm>)

Già scaricabili le Release Candidate di Lightroom e Camera RAW

Gli **Adobe Labs** hanno annunciato il rilascio delle versioni **RC** di **Lightroom v4.2** ed **ACR v7.2**.

Aggiunto il supporto alle ultime digitali, tra cui le **Canon EOS M** e **650D**, la **Pentax K-30** e la best-seller **SONY RX100**; di seguito la lista, in lingua inglese, dei bug corretti con le ultime release; al link in calce, la pagina per il download.

Lista Ufficiale Bug-fix

- *Folder stacks with virtual copies get unstacked when moving to another folder* Stacked photos get hidden in both the Grid view and Filmstrip. This occurs when photos get unstacked as a result of enabling auto-stacking.
- *Errors encountered when publishing videos to Facebook through the Facebook Publish Service*
- *Users may have occurred problems when trying to enter the Web Module from Library.*
- *Unable to edit JPEG photos in Photoshop Elements*
- *Unable to upload files to Flickr if there is a carriage return in either the Title or Caption fields (Win only).*
- *Background graphics that are applied to a Book globally may not appear as expected in a Saved PDF.*
- *Certain book covers had spine text positioned in a Horizontal manner, not Vertical.*
- *Double byte characters are not being exported to PDF in Books*
- *Photos were exported with original GPS coordinates recorded by the camera, not with the GPS coordinates updated in Lightroom*
- *Keyboard shortcuts in the Develop module sometimes do not work when editing an image in Process Version PV2010.*
- *Parents and synonyms of "do not export" keywords also do not export*
- *Audio does not play in video files after creating a slideshow containing music (win7 only)*
- *Tether support not working for Nikon D4, D800, and D800E (win only)*
